PROFESSIONAL SUMMARY

Senior Product Support Engineer with 5+ years of managing P0/P1 incidents across multi-tenant SaaS platforms. Hands-on experience debugging LLM-powered applications, REST APIs, and containerized services (Docker, Kubernetes). Combine strong Python scripting with a working knowledge of RAG architectures, prompt debugging, and model behavior analysis to resolve customer issues in GenAI products. Adept at SLA-driven incident management, root cause analysis, and bridging customer escalations with engineering. ITIL-aligned practitioner who translates ambiguous user symptoms into clear, actionable engineering tickets.

CORE COMPETENCIES

Incident & Support Management: P0/P1 Triage • Root Cause Analysis (RCA) • SLA Compliance • Ticket Lifecycle • Escalation Handling • CSAT Optimization • ITIL-aligned Incident/Problem/Change processes

AI/ML & GenAI: Large Language Models (LLMs) • Generative AI • Retrieval-Augmented Generation (RAG) • LangChain • Prompt Engineering • Embedding Models • Model Output Debugging • AI Incident Troubleshooting

Programming & APIs: Python • JavaScript • React • REST APIs • API Debugging (Postman, FastAPI, Flask) • SQL • MySQL • MongoDB • Git • Bash

Cloud, Containers & DevOps: AWS (Lambda, S3, CloudFront, EC2) • Azure • GCP • Docker • Kubernetes (pod debugging, service troubleshooting) • Linux • CI/CD Basics • Log Analysis (stack traces, API failure logs, container logs)

Tools & Platforms: Jira • Confluence • Monitoring & Alerting Dashboards • CRM Workflows

Soft Skills: User Empathy • Communication Across Personas (C-suite to End User) • Operating in Ambiguity • Cross-Functional Collaboration • Analytical Reasoning • Ownership Mindset

PROFESSIONAL EXPERIENCE

Classic Technologies and Business Solutions – Kochi, India

Senior Product Support Engineer | Nov 2025 – Present

- Resolved a critical P0 system failure for a VIP enterprise client within 20 minutes by analyzing multi-service logs and tracing a cascading API token expiry, preventing service disruption for 10+ stakeholders and sustaining 100% quarterly CSAT.
- Conduct proactive customer health checks and quarterly business reviews, directly contributing to a 15% increase in annual contract renewals across enterprise accounts.
- Spearheaded a knowledge-share initiative that raised documentation contributions by 30% and reduced average resolution time (ART) by 15%, upskilling the support team on systematic RCA techniques.

Itilite Technologies Pvt Ltd – Bangalore, India

Senior Product Support Engineer | Jan 2021 – Oct 2023

- Engineered a resolution API and internal support dashboard that slashed ticket turnaround from 1 day to 30 minutes (~95% reduction), consistently exceeding SLA targets and reducing manual effort across the support queue.
- Collaborated with engineering to improve Root Cause Analysis (RCA) success rate to 83%, accelerating permanent fixes and driving down recurring incident volume through trend analysis and playbook creation.
- Adapted communication depth seamlessly across user personas—C-suite executives, business travelers, and admins—ensuring clarity, trust, and faster resolution during high-pressure P1 incidents.

- Authored troubleshooting playbooks and led RCA sharing sessions that directly reduced repeat incidents and improved the team's diagnostic capability.
- Recognized as Value Champion three times (Mar 2022, Aug 2022, Mar 2023) for outstanding customer impact and ownership.

Product Support Engineer | Aug 2019 – Jan 2021

- Built Python-based APIs and self-service features that reduced contact rates by 30%, deflecting common queries and enabling L1 to resolve more issues independently.
- Designed and shipped a trip report self-service feature on the travel platform, eliminating manual support intervention and reducing related support tickets by 30%.
- Streamlined client onboarding by developing a Python automation script that replicated parent client policies across 10 subsidiaries, significantly reducing manual configuration effort.
- Automated hotel uploads and card transaction history workflows using Python, reducing recurring support team effort by 10%.

GENAI & TECHNICAL PROJECTS (Independent)

ExploreMunnar.ai – Remote

AI Platform Developer & Debugging Lead | Nov 2023 – Nov 2024

Acted as sole engineer responsible for the full lifecycle of an LLM-powered travel recommendation platform, gaining deep exposure to GenAI support scenarios:

- Debugged production issues in the LLM inference pipeline, including model latency spikes, token limit overflows, and prompt injection failures, by analyzing API response logs and stack traces.
- Implemented log-based monitoring for the Retrieval-Augmented Generation (RAG) module, proactively identifying embedding mismatches between user queries and vector store that caused irrelevant itinerary suggestions.
- Resolved user-reported itinerary inaccuracies by tracing the failure to the retrieval agent's chunking strategy, then rolling out a hotfix to the prompt engineering workflow—mirroring L2 root cause analysis.

NightingaleCompass.com – Remote

Full Stack Developer & Cloud Architect | Nov 2024 – Oct 2025

- Designed and developed a tourism web platform (FastAPI, React, MongoDB) delivering dynamic content and personalized recommendations.
- Architected a cost-efficient serverless AWS deployment using S3, Lambda, and CloudFront; established proactive API failure monitoring that caught contract mismatches between React SPA and backend, preventing user-facing errors.

CERTIFICATIONS & CURRENT UPSKILLING

- **Introduction to Generative AI** — Google Cloud Skills Boost (Credential ID: 9402816)
- **Introduction to Large Language Models** — Google Cloud Skills Boost (Credential ID: 9546437)
- **Deep Learning Foundations: Natural Language Processing with TensorFlow** — LinkedIn Learning

EDUCATION

Master of Computer Applications (MCA)

Velammal College of Engineering and Technology (Anna University), Madurai, India | 2011 – 2014

Bachelor of Science

The American College, Madurai, India | 2008 – 2011
